Fluid	Sanitary or Caustic Fluids
Voltage	120V, 230V, 460V, 12V, 24V, 3 Phase
Speed	60GPM

PRODUCT DESCRIPTION

The self-priming capability of Ampco's SP liquid ring pumps make them ideally suited for CIP return applications and for handling products with entrained air.
• The ability to handle products with entrained air makes SP pumps extremely efficient for emptying tanks and drums.
• Tight manufacturing tolerances and the unique vane-shaped impeller enables SP pumps to handle shear sensitive products efficiently.
• SP pumps are available with either single or double external mechanical seals. • Standard adapters are made of 304 SS to resist corrosion.
*Pumps are in conformance with 3A sanitary standards for centrifugal and positive rotary pumps for milk and milk products, Number 02-10.
SP-Series pumps have a standard 32RA (150 grit) finish, on all product contact surfaces.
